

AQUA-Q

Online Water Control & Ozone Application

IWA (International Water Association) honors Aqua-Q AB, a Swedish SME with Gold innovation Award for its ground-breaking innovation AQUATRACK®, online optical early warning system for contaminants in water, sampling and removal of contaminants as a Market-changing Water Technology and Infrastructure.

AQUATRACK® was named among the best in the world after fierce competition featuring 160 entries from 45 countries. Silver award was given pure ALTA, Florida and Bronze award was given to Embedded Wastewater Treatment Plant, SUEZ, the top three at the International Water Association (IWA) Project Innovation Awards in Tokyo, Japan on Monday, September 17, 2018, for its forward-thinking applications and solutions.

Water is the most important premise for a healthy and good life. Recognizing contamination in an early stage can save lives and increase the possibility of finding solutions quickly. The project AQUATRACK® can improve the living condition of many people and prevent epidemics. It uses a minimum of energy and causes no emissions. It is a great contribution to humanity.

Application: Surveillance of Drinking water reservoirs, Water for hospital, Food production water, Monitoring of MBR process effluent, Reuse of water etc.

International Business developer and Investors are sought.
